ergonomic keyboards.

# ergonomic keyboards.

Chances are you have a kink in the wrists while typing.  
That happens automatically when you use a standard keyboard.

In order to be able to type with straight wrists, we have developed an ergonomic split keyboard that consists of two separate parts. These parts can be placed freely on the desk, so that you can type in a healthy way in any working position. Our keyboards stand out for their minimal thickness. A flat keyboard provides a flat, relaxed position for the hands. This way the tendons in the wrists are relieved and the blood circulation in your hands remains intact. The special scissor mechanism in the keys provides a light keystroke, so you need less power to type. Do you also find it difficult that, if you are right-handed, with a standard keyboard you always have to reach sideways to the mouse? By constantly reaching out with your right arm, you can burden your wrist and shoulder unnoticed. To avoid overloading, it is important to keep both hands within shoulder width. That's why our ergonomic keyboards are designed to be compact.

option

## Compact.

The Ergo Compact Keyboard is a compact ergonomic keyboard. During simultaneous use of keyboard and mouse, the hands will always remain within shoulder width. This gives the shoulder and elbow naturally relaxed positions which will help prevent strain complaints such as RSI.

Light keystroke for minimum muscle tension, prevents reaching for the mouse  
Easy to take with you

€ 33,-

### Specifications

Order number	O-KEY-C-QY for QWERTY O-KEY-C-QZ for QWERTZ O-KEY-C-AY for AZERTY
Model and function	
Model:	Compact Keyboard

HS code (tariff):	84716060

option

## Split.

This keyboard offers all the ergonomic features you need to type in a healthy way. Its compact design ensures that while using both the keyboard and mouse, your hands always remain within shoulder width. The two components can be placed in any desired position. This unique design prevents reaching with the arm and ensures a natural and relaxed position of the shoulders, elbows, and wrists. Thanks to the light keystroke, there is a minimal amount of muscle tension while typing.

ergonomic mouse.

# ergonomic mouse.

Did you know that many computer related complaints are caused by the mouse? A standard mouse puts your hand and wrist in an uncomfortable position and also provokes small, stressful movements.

It is very difficult to unlearn your learned way of using the mouse. With an ergonomic vertical mouse, you are subconsciously stimulated to use your mouse healthily. Our HE mouse makes sure your hand and wrist are in a natural position, like when you shake hands with someone. In addition, this mouse stimulates you to move from your arm instead of your wrist. This relieves small muscles and tendons in your hand and forearm and stimulates the blood circulation.

left handed available

## HE mouse.

### Vertical mouse: prevents RSI

The HE Mouse has a vertical grip which provides a neutral, relaxed position of the hand and wrist. You move from the forearm instead of your wrist, which prevents RSI. The mouse fits comfortably in your hand and supports your wrist and fingers.

€ 39,-

mobile device stands.

# mobile device stands.

Did you know that your neck muscles constantly have to lift your head in a bent posture? With the chin on your chest, the force on your neck will soon be 27 kilos.

And it is precisely this curved posture that is common in laptop and tablet use. Research has shown that mobile devices pose a greater health risk than the use of a fixed PC. For example, a laptop cannot be adapted to the user: the keyboard is attached to the screen and the mouse control is unfavourable. With more than 2 hours of laptop use per day, the risk of complaints already increases considerably. In order to be able to work healthily with your laptop, chromebook or tablet, we have developed ergonomic mobile devices. These stands easily bring your screen to eye level. This way your head is in a natural position and the tension in your neck and shoulder muscles is reduced. Don't forget to use a separate keyboard and mouse.

## Riser Attachable.

### Laptop stand made of aircraft aluminium

The Riser Attachable Laptop Stand is an ergonomic addition to your laptop. This laptop stand is made of aircraft aluminium and is only 1.2 mm thick. It sets your laptop to the desired height.
